brand for serious climbers. For the past five years,
mental principles of good gear: minimalist design,

At Crux, it remains
our ambition to
produce the
meanest and,
quite literally, the
leanest climbing
products you will
ever need.

CRUX

eVent shell clothing

The crux range of outerwear comprises three pieces: a full-zip jacket, a half-zip smock, and a pair of pants. Each style is made from the highly breathable and fully waterproof eVent membrane married to a tough and durable face fabric. All the garments nevertheless weigh under 500g due to

their simple and minimalist design. In developing the crux clothing range, we have concentrated not just on reducing weight but above all on getting the right fit. As a result, we believe we have the best fitting shell garments available for the active mountaineer.

Modern technologies have produced numerous fabrics that can be called waterproof and breathable, but only one came into consideration for our crux climbing shells – eVent. We started using eVent back in the late '90s and were immediate converts. The breathability of eVent is far superior to anything else we have used.

Flak smock

The Flak smock is a rugged lightweight climbing shell for serious mountaineering. It is almost impossible to find a smock suitable for climbing today, let alone one that won't fall to pieces on its first route. This is a specialist product you won't find offered by anyone else.

Price:	£ 160.00
	€ 250.00

Specifications

Fabric:	eVent
Colour:	Red
Weight:	450g
Sizes:	Medium
	Large

Features

Long front zip – for ease of putting on/taking off and ventilation
Large tunnel pocket
Full mountain hood – for use with a helmet

Flak jacket

The Flak jacket is an uncompromising all-weather mountaineering garment. Light and tough, it has only what is needed – a full mountain hood and two generous pockets.

Price: £ 200.00
€ 300.00

Specifications

Fabric:	eVent
Colour:	Carbon
	Red
Weight:	475g
Sizes:	Small
	Medium
	Large
	Extra-large

Features

Roomy chest pockets – Napoleon style so nothing falls out
Full mountain hood – for use with a helmet

Flak pants

The Flak pants are simple and robust overtrousers with an active cut for good freedom of movement. We think they are as functional as bib pants, but lighter and much easier to live with.

Price: £ 150.00
€ 240.00

Specifications

Fabric:	eVent
Colour:	Carbon
Weight:	450g
Sizes:	Small
	Medium
	Large
	Extra-large

Features

3/4-length side zips – these open wide enough to allow pulling over boots fitted with crampons
Internal waist belt – helps prevent the trousers from riding down
Kevlar reinforcement panel on inside lowerleg inside

Alpine rucsacs

Real climbers like clean, simple and robust sacs. Crux rucsacs are stripped of all but the most essential features. Those retained have been engineered for ease-of-use; that is, easy to find, easy to grab, and easy to operate.

Although trimmed of every excess gram, this has not been at the expense of durability. The Kevlar/Cordura fabric is no lightweight ripstop, but a 200 g/m² tightly-woven material with exceptional tear strength and abrasion resistance.

In pushing boundaries, climbers often sacrifice comfort for speed. Not at crux. Our rucsacs combine their minimalist specification with ergonomic design, alloy frames* and a choice of back lengths** to ensure better stability and comfort when carrying full racks into big routes.

(* except the frameless AK30 ** except the AK30 and AK37)

AK30

The AK30 is a compact, frameless, roll-top sac for fast and light technical routes. The shoulder straps fold away behind the back to convert into a haulbag. At home on either rock or ice routes, this is a versatile, easy loading and easy handling sac.

Price: £ 80.00
€ 130.00

Specifications

Capacity: 30 litres
 Colour: Gunmetal
 Weight: 700 g
 Fabric: Kevlar/Cordura
 Frame: frameless padded back panel
 Sizes: One size

Features

Roll-top closure system
 Side compression cords
 Oversized back haul loop – easy to grab and clip
 Two ice-axe holders
 Shoulder straps fold away for easier hauling

AK37

The AK37 is a compact climbing sac for mountaineering and alpine rock routes. Uniquely for a sac this size, it has a frame, making it comfortable to carry even when laden with 10 kg of ropes and hardware.

Price: £ 100.00
€ 160.00

Specifications

Capacity: 37 litres
 Colour: Gunmetal
 Weight: 975 g
 Fabric: Kevlar/Cordura
 Frame: 2 x 8.50 mm Ø 7001-T6 alloy stays
 Sizes: One size

Features

Side compression straps
 Oversized back haul loop
 External and internal lid pockets
 40mm webbing waistbelt
 Two ice-axe holders
 Stretch wand pockets

AK47

The AK47 is a versatile alpine-climbing sac. Small enough for shorter climbs, it is also big enough for multi-day routes. It can carry a heavy load of hardware to the bottom of a route with sufficient comfort, yet when empty is so light you hardly notice it. The classic alpine sac.

Price: £ 120.00
€ 190.00

Specifications

Capacity: 47 litres
 Colour: Gunmetal
 Fabric: Kevlar/Cordura
 Frame: 8.00 mm Ø 7001-T6 alloy frame
 Weight: 1170 g
 Sizes: 1, 2, 3

Features

Side compression straps
 External and internal lid pockets
 Top compression strap
 40mm webbing waistbelt
 Two ice-axe holders
 Stretch wand pockets
 Reinforced, double-layer base panel

AK47-X

The AK47-X is identical to the AK47, but features a removable, floating adjustable lid instead of a fixed one. For many climbers, the extra 5 litres made possible by the adjustable lid make this a more versatile sac than the standard AK47.

Price: £ 130.00
€ 200.00

Specifications

Capacity:	47 + 5 litres
Colour:	Red
Fabric:	Kevlar/Cordura
Frame:	8.00 mm Ø 7001-T6 alloy frame
Weight:	1190 g
Sizes:	2, 3

Features

Removable floating lid
Side and top compression straps
External and internal lid pockets
40mm webbing waistbelt
Two ice-axe holders
Stretch wand pockets
Reinforced double-layer base panel

AK57

The AK57 is the big brother to the AK47 and features the removable floating lid of the 47-X. The larger capacity of the AK57 makes it a suitable sac for lightweight expeditions on high altitude climbs, or for more traditional, less technical alpine routes.

Price: £ 140.00
€ 225.00

Specifications

Capacity:	57 + 5 litres
Colour:	Gunmetal
Weight:	1270 g
Fabric:	Kevlar/Cordura
Frame:	8.00 mm Ø 7001-T6 alloy frame
Sizes:	1, 2, 3

Features

Removable floating lid
Side and top compression straps
External and internal lid pockets
40mm webbing waistbelt
Two ice-axe holders
Stretch wand pockets
Reinforced double-layer base panel

AK70

The AK70 is a large expedition sac suitable for climbs in the Greater Ranges. It can carry a heavy payload of 25-30 kgs in reasonable comfort, but still remain light enough to be used for a summit push.

Available mid 2007.

Price: £ 170.00
€ 250.00

Specifications

Capacity:	70 + 7 litres
Colour:	Red
Weight:	1500 g
Fabric:	Kevlar/Cordura
Frame:	8.00 mm Ø 7001-T6 alloy frame
Sizes:	1, 2, 3

Features

Removable floating lid
Side and top compression straps
External and internal lid pockets
40mm webbing waistbelt
Two ice-axe holders
Stretch wand pockets
Reinforced double-layer base panel

Mountain tents

Crux tents are first and foremost shelters, built to withstand the very worst conditions. They wrap the strongest lightweight fabrics around a solid four-pole geodesic shape. The standard configuration, however, has been modified to provide a generous porch at one end and a rigid aerodynamic shape at the other, striking an optimum balance between space and strength.

Not only do the crux tents offer an exceptional amount of living space within a compact footprint, but they are also the lightest double-skin mountaineering tents available (and by some margin).

X2 Storm

The X2 Storm is a four-pole asymmetric geodesic tent that weighs 2.95 kg (complete). Using the best fabrics and components available, it is the lightest pure mountain tent available with no compromises made in strength or durability.

Specifications

Weight:	2.95 kg complete
Colours:	Red
	Gold
	Green
Flysheet	72 g/m ² high-tenacity nylon 6.6 7000 mm hydrostatic head silicone coating
Groundsheet	92 g/m ² taffeta nylon 7000 mm hydrostatic head PU coating
Inner canopy	35 g/m ² high-tenacity nylon 6.6
Poles:	4 x 9.35 mm DAC Featherlite
Guylines:	4 x 3-way attachment, 1.75 mm Dyneema with mini-Linelok adjusters
Pegs:	12 x 7001-T6 square-section alloy pegs, (weight 12 g each)

Features

- Generous porch
- Rear storage vestibule (internal access only)
- Internal storage pockets
- Two front and single rear vents in flysheet

Price:

£ 395.00

€ 595.00

X2 Bomb

The X2 Bomb is a four-pole asymmetric geodesic tent with a fifth pole supporting an extended porch. Weighing less than 3.50 kg (complete), it is still lighter than most mountain tents with only a standard vestibule.

Specifications

Weight:	3.50 kg complete
Colours:	Red
	Gold
	Green
Flysheet	72 g/m ² high-tenacity nylon 6.6 7000 mm hydrostatic head silicone coating
Groundsheet	92 g/m ² taffeta nylon 7000 mm hydrostatic head PU coating
Inner canopy	35 g/m ² high-tenacity nylon 6.6
Poles:	5 x 9.35 mm DAC Featherlite
Guylines:	6 x 3-way attachment, 1.75 mm Dyneema with mini-Linelok adjusters
Pegs:	16 x 7001-T6 square-section alloy pegs, (weight 12 g each)

Features

- Extended porch vestibule with door each side
- Extra-long inner tent
- Internal storage pockets
- Two front and single rear vents in flysheet

Price:

£ 475.00

€ 695.00

Daysacs and accessories

Crux daysacs share the same functional minimalism as the alpine rucsacs. Tough, robust and no-nonsense, they have a big compartment for the big stuff, and a small front pocket for the small stuff. Their welded construction means they are waterproof unless you go diving.

Our expedition holdall combines vast carrying capacity with low weight. Furthermore, when not in use it packs down easily and compactly.

With offcuts from our alpine rucsac fabrics going to waste on the cutting room floor, we decided that chalkbags were a much better solution than landfill. Both models close at the neck with a sleeve of silicon-coated nylon (used on our tent flysheets) with a Dyneema drawcord that absorbs neither water nor chalk dust and will certainly never break.

Mag 22

The Mag 22 is a simple, robust daysac that adheres to our ruthless principle of functional and minimalist design. Its deceptively spacious interior is easily accessed via the 270° zip opening. A flat front pocket secures the smaller items.

Price: £ 50.00
€ 79.00

Specifications

Capacity: 22 litres
Colour: Black
Fabric: 420d PU-coated nylon
Weight: 740 g

Features

Welded, waterproof construction
Flat front pocket
Padded back

Mag 28

Identical to the Mag 22 in terms of its main compartment, the Mag 28 features a larger-capacity front pocket. Like the Mag 22, its dark featureless looks make it the ultimate in stylish anonymity.

Price: £ 60.00
€ 99.00

Specifications

Capacity: 28 litres
Colour: Black
Fabric: 420d PU-coated nylon
Weight: 780 g

Features

Welded, waterproof construction
Walled front pocket
Padded back

Bodybag 90

Made from 420-denier nylon with a thick PU coating on both sides, the Bodybag 90 is highly abrasion and tear resistant. Its seams are bonded by ultrasonic welding and so cannot come unsown or unglued. The full-length heavy-duty #10 zip is equally robust. Designed for expedition (ab)use.

Price: £ 80.00
€ 130.00

Specifications

Capacity: 90 litres
Colour: Black
Fabric: 420d PU-coated nylon
Weight: 1015 g

Features

Welded, waterproof construction
Flat side pocket
Padded back
Large carry straps (can be worn like a backpack)
Carry handles at each end

Chalkbags

Climbers fall into two categories: those who plaster their hands with chalk and those who occasionally dust the odd digit or two. Crux has a chalkbag for each.

Kevlar chalkbag

Designed for plasterers, this chalkbag uses stiff Kevlar fabric that keeps its shape all the time. Most useful when gripped.

Price: £ 12.00
€ 20.00
Colour: Red
Gunmetal

Dynatec chalkbag

The light and soft Dynatec fabric has a stiffened rim to ensure the mouth always stays open. The favoured choice of dusters.

Price: £ 8.00
€ 14.00
Colour: Quartz
Carbon
Acid
